

Fall in love with Edpuzzle in 30 min

Goal: Teachers will go home with an account, a lesson they can use next week, and a clear understanding of how to introduce it to their class.

5' Opening: Attendees explain one of these three challenges: different learning speeds, students not being engaged or no time to cover the curriculum

3' Relevance: Explain what Edpuzzle is and how it helped you solve that challenge. Use the slides that focus on the benefits and when to use Edpuzzle.

10' You play: Go to Edpuzzle and explain how to create an account, how to find a video, embed a question and assign it to a class. Show off the analytics, too!

10' They play: If they have devices, they can create their account and a lesson. If they don't have devices, brainstorm in groups.

2' Closing: Review the key takeaways: The benefits of Edpuzzle and the steps to follow to get set up. Q&A
